DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species.

- I. An output time management apparatus that downloads digital watermarked object data, erases the object data when an accumulation time reaches an upper time limit, and is constantly in contact with a distribution source (Embodiment 1; figures 2-7; pages 8-20).
- II. An output time management apparatus that downloads problem object data from a distribution source and sends the object data back to the distribution source when an accumulation time reaches an upper time limit (Embodiment 2; figure 8; pages 21-25).
- III. An output time management apparatus that downloads digital watermarked object data, erases the object data when an accumulation time reaches an upper time limit, and operates offline (Embodiment 3; figures 9-21; pages 25-42).

The species are independent or distinct for the following reasons. Inventions I, II, and III are directed to related products. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, inventions I, II, and III have materially different modes of operation.

Inventions I and II erase the object data when an accumulation time reaches an upper time limit, and invention II sends object data back to a distribution source when an accumulation time reaches an upper time limit. Invention I constantly communicates with a distribution source, and invention II operates offline.

Application/Control Number: 10/043,246

Art Unit: 2153

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 5, 9, 10, and 14-17 are generic.

A telephone call was made to Stephen Becker on 09 May 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip S. Scuderi whose telephone number is (571) 272-5865. The examiner can normally be reached on Monday-Friday 9:00 am - 5:30 pm.

Art Unit: 2153

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenton B. Burgess can be reached on (571) 272-3949. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
